

Mortard

Portland Cement Retarding Additive

Description:

Mortard is a chemical admix to retard the initial set of mortars, grouts and concrete. It is effective in slowing down the initial set, so the proper finish or placement can be obtained in hot weather conditions. It will also allow to reduce the amount of water needed to obtain workability that is lost during precipitated hydration due to hot weather and extreme windy dry conditions.

Uses:

Can be used in concrete, mortars, thin toppings and plasters and all Portland cement mixes.

Limitations:

Do not exceed the recommended dosage.

Installation:

Prepare mix and add Mortard to batch water, mix all components by mechanical mixing to obtain a thoroughly well mixed product.

Packaging:

Available in cases of 4 X 1 gallon jugs.

Compliance:

ASTM C-494 chemical admixture

Clean-up:

Use water.

Safety and Disposal:

Harmful if ingested. Keep away from children and pets. Wear eye and skin protection. Wash hands before eating or handling food stuff. Do not dispose of into sewers or storm drains or lakes, etc. Dispose of containers properly following local ordinances.
